

Plugin user manual

Custom Registration Form + Antibot + Puzzle + Geoblock

Author: *Marcin Ruciński*

1. General description

This plugin adds a custom user registration form to WordPress with extensive anti-bot protection .
Features:

- **Registration form** called with the shortcode [custom_register].
- **Anti-bot puzzles** – questions with simple answers that you can edit yourself.
- **Geoblocking** – ability to enable/disable registration blocking from selected countries.
- **Disposable e-mail** – ability to block registrations from disposable domains (e.g. mailinator.com).
- **Additional security features** : honeypot , time limits, attempt limits, name and surname analysis, strong password requirements, privacy policy acceptance required.

2. Installation

1. Copy the plugin file to the directory:
2. wp-content / plugins / mr - custom - registration -form/
3. In your WordPress dashboard, go to **Plugins → Installed Plugins** .
4. Find *Custom Registration Form + Antibot + Puzzle + Geoblock* and click **Activate** .

3. Adding a form

Where you want to display the registration form, insert the shortcode :
[custom_register]

4. Configuration in the administration panel

After activating the plugin, a menu appears in the cockpit:

Settings → Registration (Antibot)

There you will find three sections:

4.1. Puzzles (antibot)

- You can **add, edit and delete** questions and answers.
- Responses are compared after normalization (lower case, no excess spaces).
- If a specific form is required (e.g., capital letters), add it in the question text.
- There must always be at least one question remaining.

4.2. Geoblocking

- **“Enable registration geoblocking”** option – check to activate blocking.
- **“List of countries (ISO-2)”** field – enter country codes, e.g.:
- RU, BY, KZ
- You can separate with commas, semicolons or a new line.
- If the list is empty, the default (RU and BY) is used.

4.3. Disposable email

- **“Block registrations from disposable email domains”** option – check to enable.
- **“Domain list”** field – enter the domains of disposable mailboxes, e.g.:
- mailinator.com
- yopmail.com
- tempmail.com
- Please enter without spaces or the "@" sign.
- Subdomains are blocked automatically (e.g. abc.mailinator.com).
- If the list is empty, the plugin will use the default one (several popular domains).

5. How the form works

- **Honeypot** – a hidden field for bots.
- **Time limit** – the form must be completed in at least 3 seconds, maximum 30 minutes.
- **Rate limit** – maximum 5 registration attempts from one IP per hour.

- **Geoblocking** – blocks registration from specific countries (if enabled).
- **Disposable e-mail** – blocks registrations from disposable domains (if enabled).
- **Name and surname** – verification of length, uniqueness, lack of numbers and repetitions.
- **Password** – min. 10 characters, 1 capital letter, 1 number, 1 special character.
- **Consent** – acceptance of the privacy policy required.

6. Messages in the form

- **Errors** – e.g.: "Incorrect answer to puzzle", "Please enter a valid email address".
- **Success** – After registration, the user will see the message:
"Account has been created. Please check your email to log in."

7. Frequently asked questions (FAQ)

1. Can I use my own anti-bot questions ?

Yes, you can edit them in the settings panel.

2. Can geoblocking be disabled completely?

Yes – uncheck the "Enable registration geoblocking " option.

3. Can I add my own disposable domains ?

Yes – enter them in the Disposable email section.

4. What if I delete all questions/countries/domains?

The plugin will automatically restore the default list.

8. Requirements

- WordPress 5.8+
- PHP 7.4+
- Administrator rights

9. Author and support

Rejestracja – ochrona antybot i walidacje

Skonfiguruj łamigłówki antybot, geoblokadę oraz sprawdzanie domen jednorazowych.

MARCIN RUCIŃSKI
TWÓJ EKSPERT W WIRTUALNYM ŚWIECIE

Łamigłówki (antybot)

Pytanie	Odpowiedź	Usuń
Napisz słowo POLSKA wielkimi literami.	POLSKA	Usuń
Jakie jest pierwsze słowo w nazwie „Serce na Banacha”?	Serce	Usuń
Ile to jest 7 + cztery? (podaj liczbę)	11	Usuń
Podaj trzeci znak ze słowa „SERCE”.	R	Usuń
Dokończ: zdrowe ____ (podaj „serce”).	serce	Usuń
Napisz miesiąc: po lipcu (po polsku, małymi).	sierpień	Usuń

+ Dodaj pytanie

Geoblokada

Włącz geoblokadę rejestracji

Lista krajów (ISO-2), rozdzielane przecinkiem, średnikiem lub nową linią:

RU, BY

Disposable e-mail

Blokuj rejestrację z jednorazowych domen e-mail

Lista domen jednorazowych (bez @), rozdzielane przecinkiem, średnikiem lub nową linią:

mailinator.com
 yopmail.com
 tempmail.com
 10minutemail.com
 guerrillamail.com
 discard.email

[Zapisz zmiany](#)

Wskazówki

- Geoblokada: wpisz kody krajów ISO-2 (np. PL, DE, RU). Niepoprawne wpisy zostaną pominięte.
- Domeny jednorazowe: jeden wpis to sama domena (np. mailinator.com), bez spacji i bez znaku @. Subdomeny są automatycznie blokowane, jeśli kończą się na wpisanej domenie.
- Jeśli listy będą puste, wtyczka użyje zestawów domyślnych.
